

Wholesale nursery guide

Part of the Powerful Pollinators planting guides

Pollinators are an essential component of agricultural production and of healthy, biodiverse landscapes. Protecting and enhancing pollinator resources on farms will help support a diverse range of pollinators. Our Powerful Pollinator Guides provide an introduction to encouraging insect pollinators on farms, including a guide to choosing plants that will support diverse pollinators throughout the year.

This list of wholesale nurseries stock all the plants shown in the planting guide. If your local nursery doesn't stock the plant you're after, ask them to order it in. For an updated wholesale nursery list, or to find guides for other regions and other useful resources, visit the When Bee Foundation website or scan the QR code.
